Tip#5
How to use Bluetooth or AirDrop

Sharing has never been so easy with other people nearby. Forget about a cord because you can do it wirelessly...and you don't need internet!

It is smart and efficient too!

Apple Phones

1 Swipe down from the top of your homescreen. Touch and hold the network settings card. Tap AirDrop. Select the AirDrop setting: Everyone

2 On your iPhone, select the files that you want to transfer to other device.

3 After selecting the files, tap on the share icon located at the bottom-left corner of your screen to open the share menu. Select AirDop.

4 Select the other device to which you want to transfer the files from

5 Confirm you want to receive the files by selecting the accept option on the other device and the files will be sent.

Android Phones

1 Swipe down from the top of the screen. Tap and hold Bluetooth to open and ON Bluetooth.

2 Go to the folder that contains the files you want to transfer

3 Select the files you want to send. Tap the Share icon. In the list of sharing options, tap Bluetooth.

4 Tap the device you want to transfer the files to.

5 Select Accept on the receiving device to download the files
